Welcome to the Saurastra University Wi-Fi Network

How to create a profile for accessing a WiFi network, Follow the steps which is given below.

1. Open the **Start Menu -> Control Panel**

   ![Start Menu Control Panel](image)

   Go to the **Start Menu->Control Panel**

2. Click on the **Network and Sharing Center**

   ![Network and Sharing Center](image)

   Open **Network and Sharing Center**
3. When Network and Sharing Center screen appear, Click **Manage Wireless Network**

![Manage Wireless Network](image1)

4. Here you will find the **Wireless Network Connections**, You have to create a profile here to access **Wireless Network**.
5. Click **Add** button. And you will find a manually connect network screen.

![Add Wireless Network](image2)
6. Click on **Manually create a network profile**.

![Manually create a network profile](image)

This is the Most Important step, kindly take care or the Server will reject your request.

7. In the **Network name** bar type the name like (Staff or Student). As mentioned above that your ID and Password is bind with the category and it cannot interact with each other, so don’t waste your time behind trying to logging in to different SSID or different categories from yours.

For example

Type in Network name box “**Staff or Student**” first word in capital is must.

- **Security type**: WPA2-Enterprise
- **Encryption type**: AES

Click Next
8. You have successfully created your profile.
